Towards the 21st Century

by

still hungr

vest speaker at the Foreign addressing human resour sinking this column and hope that we we it we have a habit of lading to take a win major part of my job to stimulate discussion for can not track eventhoods in person, apread the word as tar affeld as possal planning and lines. Howeve

because that country is easieroup new recommendation for its future with its 10.0 visions programme. The kneegin journalists also expressed coincern about the impact of exposure growth on society both in terms of the quality of life and the erosision of too an values in a borderies would knowleder each what will be left of Thailand It also concerns me that the young generation seems to care more for material things than happiness. If this is the case then the on going delated as to whether the sounger generation behaves the way they do because the like generation has not prepared them properly suggests that we are all responsibility for these trends and we have to do something about it.

I am happy to be able to inform our readers that we are currently preparing another new project which I believe will have far reaching implications for human resources in Thailand. The project in a cooperative agreement with the Ministry of Agriculture to prepare and improve human resource is among many people. The project will introduce a new vision to the Ministry of Agricultural foroids as Mr. Petiong Pungton Na Assidhys Secretary-General of the Office of Agricultural Economics.

Secretary-General of the Office of Agricultural Economics. Last week Law a genet of the Ex effences Mordec-hay Lows, livrae's Ambassador to Thailand, and I hope to visit that country in the beginning of 1995 in order to explore possible cooperative arrangements with Israeli expects who may assist the project with the Ministry. My view is that if you capity nirral people with information, entrepreneurial and management skills, then you are giving them the tools to survive. Thailand in still nich in agricultural produce, but we must improve the income generating capacity of the people involved. In this and other respects, Lin sure that we can learn much from Israel's experience and expertise in the field of agricultural development.

in the field of agricultural development.

The Amhassador and I both hope to start another project together earls next sear which will focus on Research and Development. R&D. Thaland tacks facilities for base R&D of the land that adds value to the exconory and the makes if difficult to imagine which of Thaland's products will enjoy competitive advantages over the next. I to sears. The countric currents spends only 0.20% of Gross National Product (GNP) on R&D. Not only this, but under prevailing conditions most of the brain power sixth specialist ability in the fields of engineering, computers, and science prefer to work in the financial sector or management.

management. Therefore in difficult for us to generate enough RAD activity alone. Nevertheless, since we are very entrepreneural by nature, we do not lack the financial resources to contract researchers from overseas. In lozer we could enist the RAD services of scentists working either in the private set for ole lecturing in universities, and the same goes for the U.S or India, and so on 1 know that Dr. Olam Chappiarat, President and Ouer Executive Officer of Sam Commercia. Bank has a similar plan in relation to Silicon Valley, in the U.S. and Leopies to see more such properly forth-coming and viriding positive results for Thalianch Any contracts entered ofto, would naturally specify that the results would become the intellectual property of the Thia partners.

This work we welcome His Excellence y FH Cobosis the New Zealand Archaesa dee to our column with an insightful look at how betalena human tersions or relations between some two countries spill over into insightness relations. But before you go, I model like to contrade this week by remodeling your about no furtherning HISCProst national prosposage on Louisiance part of the model of the part of the function of the contrade the spill of the contrade the part of the function of the contrade the co will be particularly inte-hope to see you there
